

Psyc202 Table Assignment

Patnum, gender (F=0, M=1), age, MR score, LNS score

Download MRLNSage gender excel file.

MR score – mental rotation

- Number correct

LNS score – letter-number sequencing

- The task involves hearing a series of letters and digits, and then reporting back the stimuli with the letters in alphabetical order and digits in ascending numerical order.
- Number of letters and numbers the participant was able to report back correctly

Lab:

Determine Means and SDs for age, mental rotation and LNS in excel.

Create *two* tables in Word, each with 4 columns:

- Gender, age, mean, and SD
- One table for MR score and one table for LNS score
- In the notes section of the table, have the descriptive statistics for gender.

To create the table, familiarize yourself with the 'Creating_APA_Tables' pdf on the class website (hints on this will be given in class).
