

Psyc202 Qualtrics Assignment

Today we will be creating a Qualtrics survey, taking the survey ourselves, and looking at the data in excel.

1. Register on Qualtrics using your CSUF email
 - <https://www.qualtrics.com/>
2. Create a new Survey to answer the following question:
 - How does the number of credits taken by a student affect their satisfaction with school?
3. When you publish your survey, you will be given a URL. Copy that URL to the Lab 4 forum on Titanium.
 - What to post on forum: *Full name: survey URL*
4. Take at least 5 surveys posted by your classmates (the more the better).
5. Once your survey has 5 participants, download the data as a CSV.
6. Open the data in excel
7. Summarize your data in a results section in word, including at least one table or graph.
 - This will depend on how you conducted your survey
 - No stats are needed (too few participants)
