Lab 2 Assignment

Due 2/25

For lab 2, please collect data for the 'Visual Search' lab on Coglab. You want to run yourself and four other people. When you finish with one participant, click the 'Trial by trial' pull down menu and copy that data into excel. Coglab erases data each time you run it, so we need to collect the data ourselves. Please email me the excel document with the trial-by-trial data for all five participants (including yourself) before class next week.
